

The key to success is education

**LAHU-USA**  
2017-2022

# OUR STORY

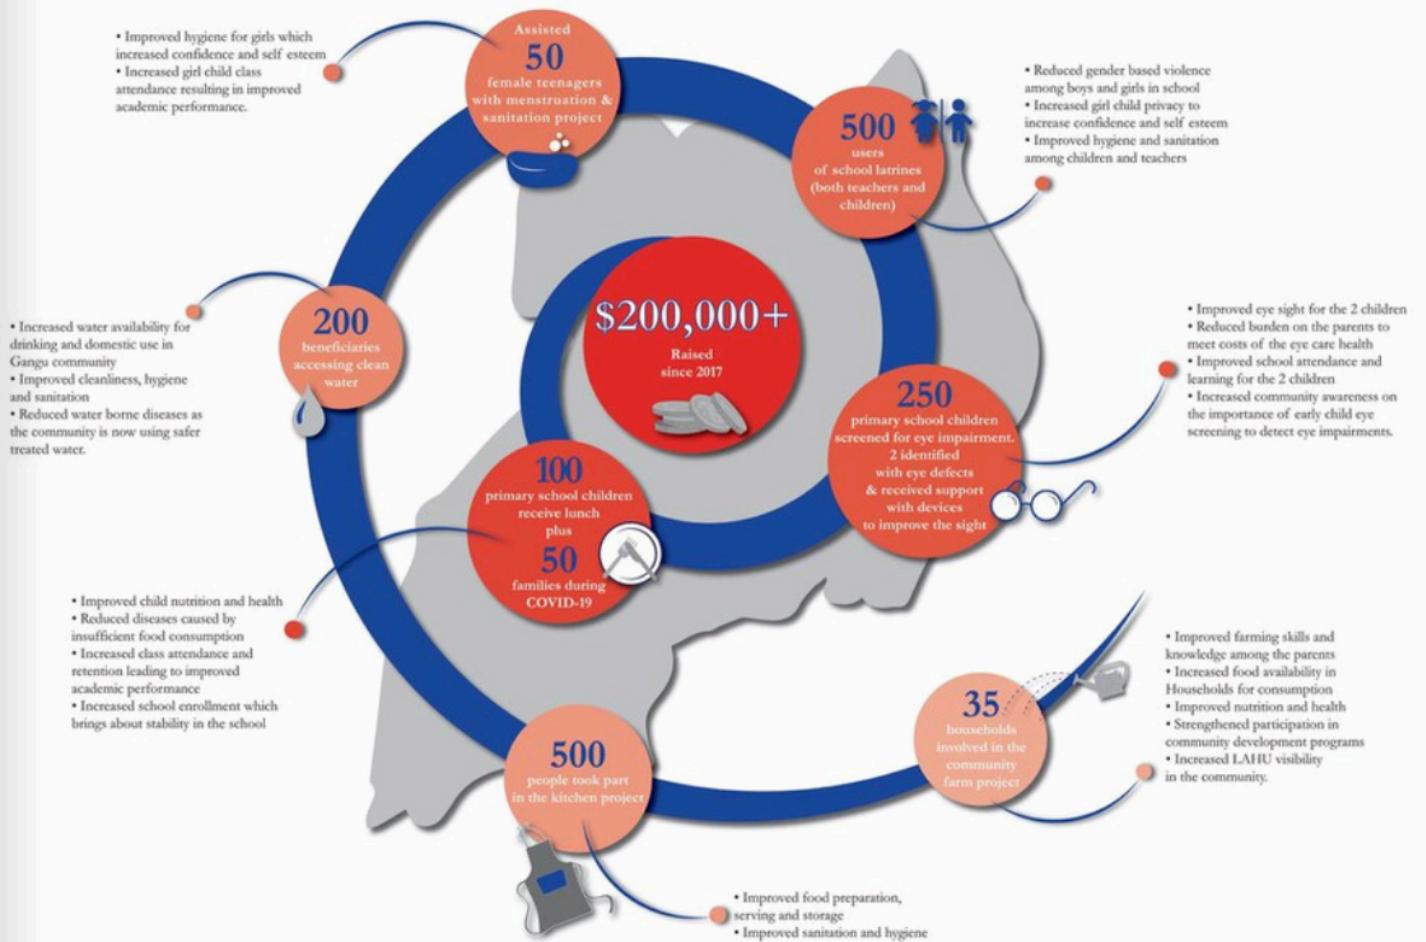

Back in 2016, Lend a Hand Uganda-USA began providing daily school lunches for 34 students most in need, who typically come from poverty stricken single parent homes. LAHU lunches, prepared by a local chef/granny, provide these children with the nutrition they desperately need. As a result, their concentration and ability to learn has significantly improved.

The lunch program has now expanded to include the Mwererwe Community Farm project, which allows us to feed many more children. The farming project was established to help increase the impact of the existing lunch program for long term sustainability.

We are now growing crops used directly for lunch preparation, allowing more children to be fed. You can help us increase the number of students in our program!

# LAHU BY THE NUMBERS

# OUR HIGHLIGHTS

## Latrines

Sanitary conditions at the schools we work with is critical to ensure children coming to school do not get sick due to poor hygiene. New latrines were constructed replacing pit latrines and offer children privacy.

NEW LATRINES FINISHED IN 2018

IRRIGATION 2019

## Irrigation

In the hot Ugandan sun, keeping crops watered is a crucial element. Parents were trained in proper irrigation practices to maintain the output of our farm.

## Matooke

A Ugandan farm is simply not a Ugandan farm without Matooke! Acreage was expanded in 2021 to plant matooke trees. They grow like and have a taste similar to plantains.

GROW MATOOKE 2021

# OUR HIGHLIGHTS

## New Kitchen

The Lunch Program needed a new kitchen! Previously, meals were cooked outdoors in a pot over an open flame. This structure provides storage and a safe place for meal preparation.

KITCHEN COMPLETED 2021

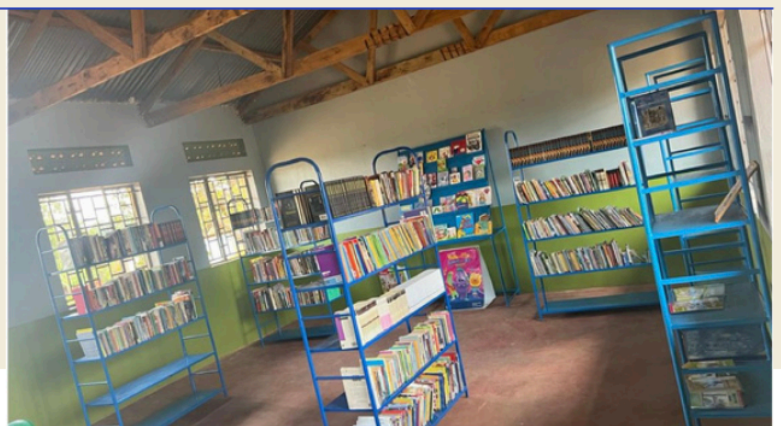

GREENHOUSE 2021

## Greenhouse

The greenhouse provides space for the team to begin new plantings, safe from the harsh Ugandan sun and potentially disastrous rains, allowing roots to develop prior to transplanting into the ground.

## Library

This project was interrupted by two years of school closures. The floor was redone and is filled with books across grade and reading levels for the children to enjoy.
